# Vittoria

## One Group

### GENERAL TECHNICAL SPECIFICATIONS

- The *Vittoria* One Group design is elegant and versatile. It can easily be converted from the self contained 5 liter water tank to a direct water source.
  - The internal rotary vane pump and motor assures consistent water pressure and a quiet operation.
  - Stainless Steel body. Heavy duty steel frame, powder coated baked-on paint finish with rust inhibitor.
  - 4 liter nickel plated copper boiler with heat exchanger and 1800W heating element.
  - Professional precision made pressurestat assures reliable water temperature control and immediate recovery.
  - Stainless steel steam wand and hot water spout.
  - Automatic self adjusting water level.
  - Professional thermally balanced group unit with heavy duty portafilter made of high quality solid brass with nickel and chromium plating.
  - Electric power supply: 125V/60hz.
  - Power consumption 14.5 Amps. Requires min. 20 Amp breaker on a dedicated line.
  - Adjustable chromium plated feet.
  - Safety feature of the self contained water tank mode: When the tank runs out of water, simultaneously, a blinking light and warning buzzer are activated and the electricity to the heating element and pump is shut off. After the tank is refilled with water, the system goes back to normal.
- Options:** Cappuccino Master™ the finest milk frother. Fun to use and easy to clean without removing it from the machine.

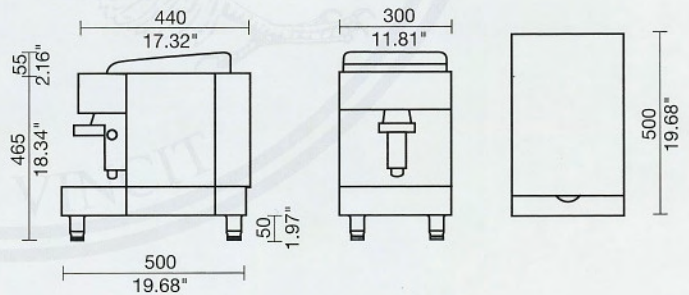

CE, ETL LISTED for UL, cUL, NSF4

### ACCESSORIES INCLUDED
