Vittoria

GENERAL TECHNICAL SPECIFICATIONS

Compact 2 Group

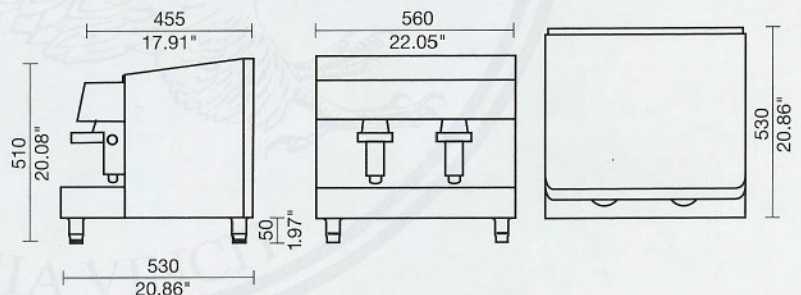

- The *Vittoria* COMPACT 2 Group espresso machine fits that special niche, where saving space is important but quality is never compromised. The COMPACT 2 Group employs the ultimate technology with the simple elegant look of tradition and strength.
- Available in either semi-automatic or automatic electronic dosing version with simple programming.
- Stainless Steel body. Heavy duty steel frame, powder coated baked-on paint finish with rust inhibitor.
- The 2 Group Compact has a 8 liter nickel plated copper boiler with internal heat exchangers and 2400 Watt heating element.
- Electric power supply: 220V/50/60hz.
- Power consumption: 11 Amps. Requires min. 20 Amp breaker on a dedicated line.
- The *Vittoria* integrates the finest electronic components to insure optimum performance and longevity.
- Precision made pressurestat assures reliable water temperature control and immediate recovery.
- Internal rotary vane motor pump.
- Thermally balanced group heads with heavy duty portafilters made of high quality solid brass, nickel and chromium plated.
- Stainless steel steam wand and hot water spout.
- Automatic self adjusting water level.
- Adjustable chromium plated feet.
- **Optional:** Pod/Cialda Adapter can be installed in the group head, it allows the operator to use pods/cialda or ground coffee and achieve a perfect extraction without making any further changes to the system.
- **Optional:** Cappuccino Master™ the finest milk frother. Fun to use and easy to clean without removing it from the machine.
- CE, ETL LISTED for UL, cUL, NSF4
